### **EXAMINER'S AMENDMENT**

1. A supplemental examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patricia Wenger on July 20, 2006.

Ms. Wenger called to note an error in the original examiners amendment. There was an exercise factor that was assigned twice, whereas one of the factors should have been a weight factor as used in the combining of factors. The weight factor is corrected to appear as it originally appeared in the claims dated March 28, 2006 Below are the claims as correctly amended. The application has been amended as follows:

Claim 1-(Cancelled)

Claim 2. (Amended) A method of matching a pet ~~The method of Claim 1, said pet being a dog~~ ~~said predetermined criteria for assigning said breed code to said plurality of breeds of said pet comprising:~~ with an appropriate product comprising the steps of:

- a. assigning a breed code to a plurality of breeds of a pet based on predetermined criteria, said predetermined criteria comprises;  
assigning an exercise factor to each of said breeds of said dog;
- b. assigning an weight factor to each of said breeds of dog and
- c. combining said exercise factor and said weight factor in a predetermined manner to determine breed code.

- b. categorizing a product to determine whether the product is appropriate for said plurality of breeds of said dog assigned to said breed code;
- c. publishing said assignment of said breed code and said categorization of said product to allow a customer to appropriately match the said product to said breeds of said pet.

Claims 4-13 (cancelled).

1. The following is an examiner's statement of reasons for allowance:
2. Claims 2 and 3 teach a method for determining an appropriate product for a pet, specifically a dog. Dogs are given a "breed code" based on the factors of weight and exercise. A breed code is matched to a product as appropriate for that "breed code". A formula is used to determine a dogs "breed code" by adding the numerical values of the weight and exercise factors together. The numerical values are determined from the chart provided in specification.
3. The prior art fails to teach the concept of a "breed code" that is determined by the specific calculation of a weight factor and an exercise factor. The prior art fails to teach a group of dogs falling into one "breed code". The prior art categorizes the dogs according to one breed or one dog specifically.
4. **US Patent 6,156,355-Shields, Breed-Specific Canine Food Formulations.**  
Shields teaches a method of determining a dog food formulation for a specific breed. The formulation of ingredients are determined based of the specific breed dietary needs and genetic uniqueness. Shields also takes a breeds/dogs allergies into consideration when determining the right ingredients.

5. **PETsMart.com Dog food Calculator:** PetSmart teaches a method similar to shields however, is gear more directly to an individual dog. PetSmart does not consider breed as a factor when determining the appropriate food for the dog. PetSmart brings in multiple factors specific to the individual dog before determining what dog food is appropriate for that dog.

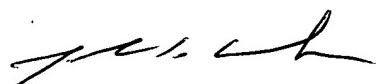

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
